## Partnership Plan

# BL2021

JOIN US ONLINE  
FOR A VIRTUAL CONFERENCE  
JULY 6<sup>TH</sup> TO 9<sup>TH</sup>, 2021

## WELCOME

It gives us great pleasure to welcome all of you to the online conference **Bryophytes, lichens, and northern ecosystems in a changing world** (July 6-9, 2021). The Québec B(ryophytes) and L(ichens) (BL2021) will bring together four major bryological, lichenological and botanical societies: the International Association of Bryologists (IAB), the American Bryological and Lichenological Society (ABLS), the Canadian Botanical Association (CBA-ABC) and the Société québécoise de bryologie (SQB).

The conference will consist of a four-day scientific program, and speakers are invited to submit papers on all scientific aspects of botany, bryology and lichenology and northern ecosystems. We will address diverse topics including climate change, genomics of model organisms, conservation, biogeography, ecology, genetics, phylogenetics and physiology together with newer areas like epigenomics, environmental DNA studies and cryptogamic polar biology.

On behalf of the organizing committee, we are looking forward to welcoming you to the virtual meeting in July 2021!

*The Organizing Committee*

## TOPICS

Bryophyte, lichen and general plant:

- Anatomy
- Climate change science
- Conservation
- Ecology
- Education
- Evo-devo
- Floristics
- Genomics
- Microbiome & symbiosis
- Molecular evolution
- Morphology
- Physiology
- Systematics & taxonomy
- Synthetic biology
- Phylogenomics

VISIT THE BL2021 WEBSITE: [bl2021.org](http://bl2021.org)

## BENEFITS

### For Partners

- Stand out from the competition and benefit from this unique opportunity to meet with researchers and students from all over the world.
- Meet with potential employees and clients.
- A single place to keep abreast of new trends with a top-rated scientific program.

### For Attendees

- Top-rated, peer-reviewed scientific paper sessions.
- Special and invited paper sessions of topical interest.
- Virtual expo to discover the partners' latest products and services.
